**Translating Dependent Type Theory into Higher Order Logic ...**

This paper describes a translation of the complex calculus of dependent type theory into the relatively simpler higher order logic originally introduced by Church. In particular,

it shows how type dependency as found in Martin-LL of's Intuitionistic Type Theory can be simulated in the formulation of higher order logic mechanized by the HOL. The HOL Theorem Prover for Higher Order Logic - cs.ox.ac.uk

The HOL Theorem Prover is a general and widely-used computer program for constructing specifications and formal proofs in higher order logic. The system is used in industry and academia to support formal reasoning in many different areas, including hardware design and verification, reasoning about
