[VoIP security architecture in brief Guardian Project](#)
Voice over IP (VoIP) has been around for a long time. It's ubiquitous in homes, data centers and carrier networks. Despite this ubiquity, security is rarely a priority. With the combination of a handful of important standard protocols, it is possible to make untappable end-to-end encryption for an established VoIP call.

Take a multi-layered approach to VoIP security - TechRepublic

Despite the growing popularity of VoIP, security remains an obstacle to more widespread adoption. However, you can make VoIP as secure as traditional phone systems by taking a multi-layered
