A NOTE ON POLYCYCLIC RESIDUALLY FINITE-p GROUPS | Glasgow ...

We characterise polycyclic residually finite- p groups in which all subgroups are almost p -closed and discuss a few conditions that are sufficient for particular subgroups H to be almost p -closed. We also present, for each prime p , an example of a polycyclic residually- p group G for which $|H : H|$ takes on all possible values, including infinity, as H varies.
